Power windows

The power windows can be opened and closed using the following switches.

1 Closing
2 One-touch closing*
3 Opening
4 One-touch opening*

*: Pushing the switch in the opposite direction will stop window travel partway.

Lock switch

Press the switch down to lock passenger window switches.

Use this switch to prevent children from accidentally opening or closing a passenger window.

■ **The power windows can be operated when**

The "POWER" switch is in ON mode.

■ **Linked door lock window operation**

- The power windows can be opened and closed using the mechanical key. (→P. 531)
- The power windows can be opened using the wireless remote control. (→P. 47)
- The power windows can be closed using the smart access system with push-button start. (→P. 35)

■ **Operating the power windows after turning the "POWER" switch OFF**

The power windows can be operated for approximately 45 seconds even after the "POWER" switch is switched to ACCESSORY mode or turned OFF. They cannot, however, be operated once the driver's or front passenger's door is opened.

■ **Jam protection function**

If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.

■ **Customization that can be configured at Lexus dealer**

Settings (e.g. linked door lock operation) can be changed.
(Customizable features →P. 571)

CAUTION

When closing the windows

Observe the following precautions.
Failing to do so may result in death or serious injury.

- Check to make sure that all passengers do not have any part of their body in a position where it could be caught when a window is being operated.
- Do not allow children to operate the power windows.
  Closing a power window on someone can cause death or serious injury.

Jam protection function

- Never try jamming any part of your body to activate the jam protection function intentionally.
- The jam protection function may not work if something gets caught just before the window fully closes.
